## EDUCATION

### Bachelor of Technology – Computer Science & Engineering

delhi, India

CGPA: 8.9/10 · Graduation: May 2025

Delhi University

- **Languages:** English, Hindi, Japanese

## EXPERIENCE

### Microsoft

Feb 2023 – Dec 2024

Operations Intern – Cloud Integration Support

Remote

- Engineered and maintained **3 real-time data pipelines** and optimized **12+ SQL queries**, reducing system latency by **40%** while enabling log-based debugging and robust data validation.
- Automated **5+ cloud integration workflows** using **Python, REST APIs**, and version control with **Git**, improving provisioning efficiency and cutting manual effort by **30%**.
- Collaborated with **3 cross-functional teams** under agile practices and contributed to **code reviews**, supporting production-grade releases and enforcing clean code standards.

## PROJECTS

### Cloud Infrastructure Deployment – AWS + DevOps Automation

June 2024

AWS EC2 · Terraform · Docker · IAM · Bash · GitHub Actions · CI/CD · Infrastructure Monitoring

- Provisioned and managed secure infrastructure across **3 isolated environments** using **AWS EC2, Terraform**, and Docker, ensuring compliance with Infrastructure-as-Code (IaC) and **design validation standards**.
- Wrote **250+ lines of Bash scripts** to automate provisioning and health checks, improving monitoring workflows and reducing manual errors by **80%**.
- Built CI/CD pipelines with **GitHub Actions**, enabling staged deployment with rollback for high-availability apps, cutting release time by **70%**.

### Digital Banking Portal – Account & Transactions System

April 2024

Java · Spring Boot · MySQL · REST API · OOP · DSA · System Reliability · Security Controls

- Built RESTful backend microservices using **Java, Spring Boot** to support **1K+ users** with **5K+ transactions/day**, simulating production-scale banking ops.
- Improved dashboard latency by **35%** by optimizing **12+ SQL queries** and **3 ingestion pipelines** using caching, indexing, and memory tuning.
- Used **OOP and SoC principles** to modularize the codebase, boosting system uptime and **fault recovery by 40%** under high-load conditions.

### GenAI Chatbot – RAG-Based Knowledge Assistant

May 2024

Python · LangChain · OpenAI API · FAISS · RAG · Streamlit · NLP · GPU Acceleration · Embedded Reasoning

- Developed a GenAI chatbot using **LangChain + OpenAI API** to handle **100+ customer queries** with **90%+ response accuracy** across varied domains.
- Enhanced FAISS-based retrieval with memory tuning, cutting irrelevant outputs by **40%** and supporting scalable user interactions.
- Launched a real-time dashboard via **Streamlit** on GPU VMs, sustaining **50+ concurrent sessions** under sub-second latency, simulating production abuse handling.

## SKILLS

**Programming Languages:** Java, Python, C++, C#

**CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Memory Management, Multithreading, Complexity Analysis

**Development Practices:** SDLC, Test-Driven Development (TDD), Unit Testing, Debugging, Code Optimization, Rapid Prototyping

**APIs & Cloud:** RESTful APIs, Microsoft Azure, AWS, CI/CD Pipelines, Logging & Monitoring Tools

**Tools & Version Control:** Git, GitHub, Agile Methodologies, Feature Implementation, Documentation

**Soft Skills:** Communication, Time Management, Adaptability, Feedback Incorporation, Growth Mindset, Team Collaboration

## SUMMARY

Final-year Computer Science student skilled in Java backend, RESTful APIs, and cloud-integrated systems. Built scalable features and data pipelines using Spring Boot, Python, and Git. Strong in DSA, OOP, modular design, and CI/CD workflows. Experienced in agile teams, version control, debugging, and delivering data-driven solutions with a growth mindset.
